PROJECTS

Real-Time Data Breach Alert System — real-time-data-breach-alert-system.vercel.app React.js · Node.js · MongoDB · Socket.io

- Architected a full-stack threat monitoring platform integrating the XposedOrNot API to detect sensitive data exposures in real-time.
- Engineered a scalable RESTful API using Node.js and Express, implementing Socket.io for live WebSockets and multi-channel instant alerts (Email, SMS).
- Built an interactive React.js dashboard to visualize breach trends, securing sensitive data with AES-256 encryption, JWT authentication, and comprehensive API security.

Currency Converter — sakibvora15-bot.github.io/api HTML5 · CSS3 · JavaScript · REST API

- Engineered a browser-based currency converter integrating a live exchange rate REST API, enabling real-time conversion across 150+ currencies.
- Built a mobile-first responsive UI with progressive enhancement; implemented client-side validation and optimised DOM manipulation for smooth performance.

Personal Portfolio Website — sakibvora15-bot.github.io/Portfolio/ HTML5 · CSS3 · JavaScript · React.js

- Built a fully responsive portfolio in React.js with reusable component architecture, a validated contact form, and SEO-optimised semantic markup.
- Applied optimised image assets, descriptive meta tags, and social media links to improve search engine discoverability and recruiter outreach.
